

IMPORTANT BENEFIT UPDATE

Subject: Podiatry Routine Foot Care Visits
Re: Health Choice Generations Membership

March 27, 2015

Dear Healthcare Provider:

As of January 1, 2015, Health Choice Generations Medicare Advantage Members are entitled to four routine foot care visits, per calendar year. The original design of the podiatry supplemental benefits was to provide members the ability to visit their Podiatrist for routine foot care (up to 4x per year) - without a prior authorization.

Effective immediately, the authorization rule has been removed for routine foot care visits. In the future, Health Choice Generations members are allowed to routinely visit their Podiatrist for routine foot care (up to 4x per year) - without a prior authorization.

Please note that all other Podiatry Services are subject to Health Choice's prior authorization guidelines.

As always, thank you for your continued partnership and commitment to quality service. If you have any questions, please contact your Provider Service Representative.

Sincerely,
Health Choice Management
